SQL Server Common Table Expressions (CTE)

CTE is an abbreviation for Common Table Expression. A CTE is a SQL Server object, but you do not use either create or declare statements to define and populate it. As with other temporary data stores, the code can extract a result set from a relational database. CTEs are highly regarded because many believe they make the code for a temporary ...

SQL Server Common Table Expression vs Temp Table

So, common table expressions can be used to restructure a query to make it more readable, by moving the subqueries out in front. But the real power of common table expressions is when you define an expression that recursively selects itself. The key to this is using a "Compound Select Statements", such as the UNION ALL operator.
