When tuning, some users may have some incorrect thought which may lead to them fitting the wrong parts for their needs. For this reason it is important for the user to know "what their target/goal" is and "what parts are needed" to achieve this goal. Here we will explain engine tuning, from light to hard, as simply as possible. Notes:

There are many tuning options and parts available to lift the performance of your engine. The overall aim needs to be to increase the useful power band. A lot of tuners quote peak BHP figures but in the real world these gains are pointless. Where the power band sits in relation to the gearing is the important thing.
