Coulomb's law. Coulomb's law gives the magnitude of the electrostatic force (F) between two charges: where q_1 and q_2 are the charges, r is the distance between them, and k is the proportionality constant. The SI unit for charge is the coulomb. If the charge is in coulombs and the separation in meters, the following approximate value for k will give the force in newtons:
 $k = 9.0 \times 10^9 \text{ N} \dots$
